Dear Grace,

It is good to hear back from you.  
Please kindly see answers to your queries below:

- 1) 1000 V
- 2) We don't have data for this value, we have the fuse current ratings, which are presented in the datasheet attached each module configuration.

We are looking forward to support you further.  
Have a nice day.

Kind regards,

Jurijus Pocema

Hi Jurijus!

I hope you have been doing well since the last time we spoke! Recently, we have gotten to the testing phase of our batteries! We had a few questions for you before we continue, and we were hoping you could answer them.

1. What is the voltage rating of the internal fusible links of the modules?

2. What is the interrupt current rating of the internal fusible links?

I've cc'ed some of my teammates, who are more specialized in these topics, to this email.

Thank you in advance for your help!

Warm regards,  
Grace Tran

Hi Jurijus,

Thanks for the update. I checked Fedex and it looks like it departed the facility in Memphis but I don't see an expected arrival yet.

With the fires we have in LA right now there might be a slight delay. I will keep looking for updates on the FedEx page.

Thanks

Yann

Happy New Year Yann,

I hope You had a good one, your order is on the way, here is the link to track delivery:

[Detailed Tracking](#)

Please NOTE that the buyer undertakes to check the received goods immediately after receiving the parcel. If the Buyer receives the order and notices any quality issues or discrepancies, the Buyer is required to promptly notify the Seller in writing within 7 days of receiving the order; otherwise, the Seller cannot be held responsible for the consequences resulting from non-compliance with this stipulation. If the parcel comes to a Buyer in a damaged package Buyer must reject the parcel, make photos, and fill up the claim for delivery company regarding damaged parcel. In case of concealed defects, the Buyer must notify the Seller within the warranty term, but always within 7 days from noticing the defect.

Please double check all the information in the invoice, delivery address, contacts and other information to be sure that the order reaches You well. If any misleading information is found, please contact us immediately.

Please find the final invoice attached.

“TempDisplay” must be removed immediately after parcel received otherwise the battery can run out.

Please let me know if You have any additional questions or concerns and thank You one more time for choosing our products.

We are looking forward to support you further with your projects.

Let's keep in touch.

Have a nice day.

Hi Jurijus,

Hope all is well.

I wanted to follow up and see when you expect to be able to ship the battery modules.

The University will be going on break starting December 21<sup>st</sup> 2024 till January 5<sup>th</sup> 2025.

If we can't have the batteries delivered by December 20<sup>th</sup> I would like to ask to hold the shipment until after January 2<sup>nd</sup> so they are not stranded somewhere since delivery is not possible.

Looking forward to hearing from you.

Best,

Yann

**Subject:** Re: Request From [enepaq.com](https://enepaq.com)

Dear Jann/Grace,

I hope you are doing well.

Just to let you know we have received your payment of 10,919.28 EUR (please see below). The Proforma invoice was issued for 11 961,54 EUR. As I understand you've paid the right amount stated but in USD currency not EUR proforma was issued for. There is a discrepancy of 1,042.26 EUR. We do understand you are in a hurry with your project and we are processing your order to a manufacturing phase.

► 2024-11-07	601931203 X080001	UNIVERSITY OF SOUTHERN CALIFORNIA 7765200619	/RFB/9790059//9790059 697044090102707062 OCMT/EUR11961.54		10 919,28
--------------	----------------------	----------------------------------------------------	--------------------------------------------------------------	--	-----------

But once we proceed with shipment of battery modules, we would need to cover this discrepancy first. We are keen on supporting you with your project and are flexible in this regard.

Please consider either paying the discrepancy or as an other option we can offer you with sponsorship discount for this amount. Please find the sponsorship discount terms and conditions below:

5%

-Enepaq logo and an active (do follow) link to the Enepaq website at <https://www.enepaq.com> among other sponsors on the team website/page. It should be published once the order financial part is completed and stay there at least as long as Enepaq products are used.

-Post on social media with a link to the website or ENEPAQ page (FB <https://www.facebook.com/enepaq> and <https://www.linkedin.com/company/enepaq>). The post should include a clearly visible Enepaq products and team project in a working environment (with or without people). In the text, you should be stating that Enepaq is sponsoring your team, how your team will benefit from this sponsorship, or what product advantages are the most important to your team.

5%

-Two logos on your car, one per side.

-At least 3 photos from different angles should be sent back to Enepaq of decent quality and with a clearly visible logo. Your team agrees that Enepaq may place these photos in their marketing material, such as among customers on [www.enepaq.com](http://www.enepaq.com) and Facebook page, but not limited to. Photos should be sent to Enepaq no later than 3 months after the products are delivered.

By combining the discounts, you save a total of 10%. And the value of sponsorship discount would be 1,100.00 EUR (we would reimburse remaining 57.74 EUR from your next order then).

If you would prefer to go with sponsorship discount we would need to sign the sponsorship discount agreement and include sponsorship discount to final invoice.

Please kindly let me know your thoughts and how you would like to proceed?

I am looking forward to support you further.

Have a nice day.

Hi Jurijus!

I don't believe we'll be needing the bus bars or the M5 bolt kit as we've designed our own bus bars for this year. Would we be able to get a new quote without these components?

Thank you!

Grace Tran
